Readers are cautioned not to place undue reliance on these forward-looking statements, which speak only as of their dates, and they should not be relied upon in making purchasing decisions.

# Introduction

This SAP Business One mobile app for Android provides access to your most relevant business information to help you run your business from any location, at any time.

You and your team stay informed about the business by viewing reports, managing contacts, and handling sales and service activities.

## **Complete:**

- View, create, and modify the information you need to do your job
- Ensure critical information is always at the fingertips of those who need it most

## **Intuitive:**

- Navigate with ease, see data graphically represented

## **Interactive:**

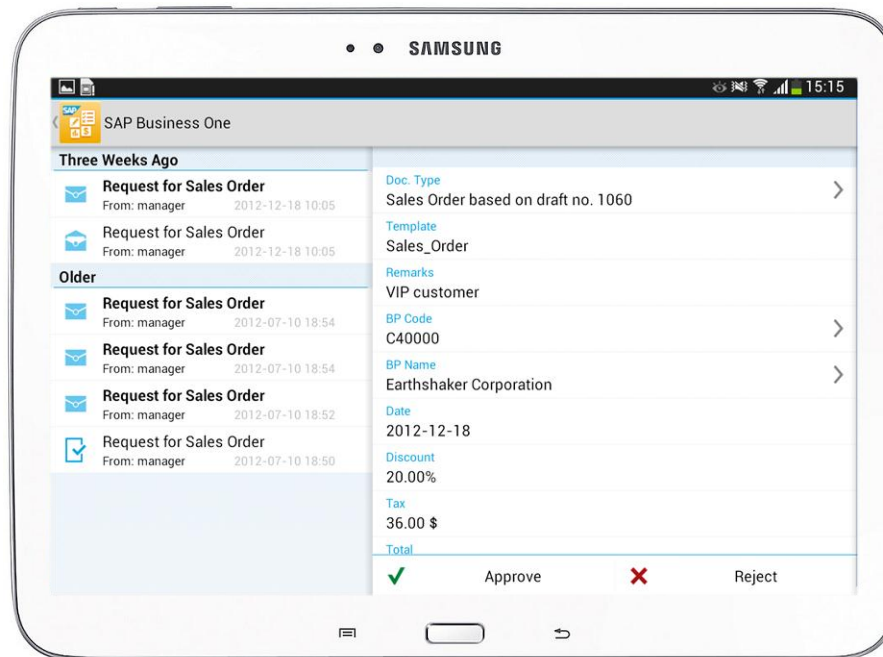

- Access data in real time
- Respond directly and trigger processes
- All changes automatically update your SAP Business One backend

# Key features - Alerts and approvals

## Automated alerts and approvals

- Get alerts on events, such as deviations from approved discounts, prices, or credit limits
- View and complete approval requests in just a few clicks
  - Review relevant data before making your decision
  - Ask for additional information or provide comments in the approval process

# Key features – Sales documents

## Simplify your sales activities

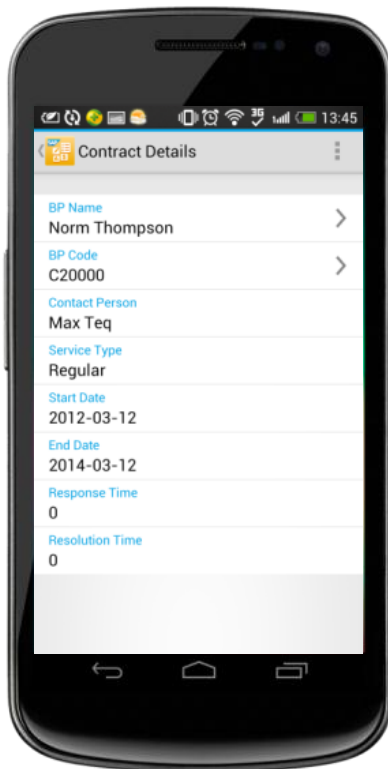

- Create, edit, or view Sales Opportunities, Sales Quotations, and Sales Orders
- Search, filter, and manage activities for Sales Documents
- Submit Sales Quotations or Sales Orders for approval
- Manage related activities directly

# Key features – Service contracts and service calls

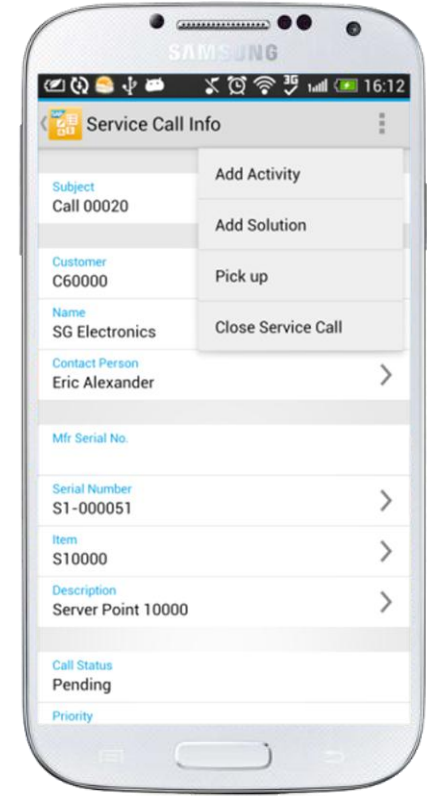

## Review service contracts

- View details of and search for service contracts
- Enter the item's serial number or keywords to search for and view customer equipment cards

## Process service calls

- Handle service activities, from picking up to closing a service call, and track solution details
- Look up related service calls from service contracts or customer equipment cards

# Key features – Reports and dashboards

**Get real-time information about your business and share it by e-mail**

## Reports\*

- Leverage predefined SAP Crystal reports to see your most relevant business information
- Tailor the app to your specific needs by customizing reports

## Interactive Dashboards

- View key business information related to Cash Flow, Sales Analysis, and Purchase Quotations
- Each chart in dashboards can be enlarged

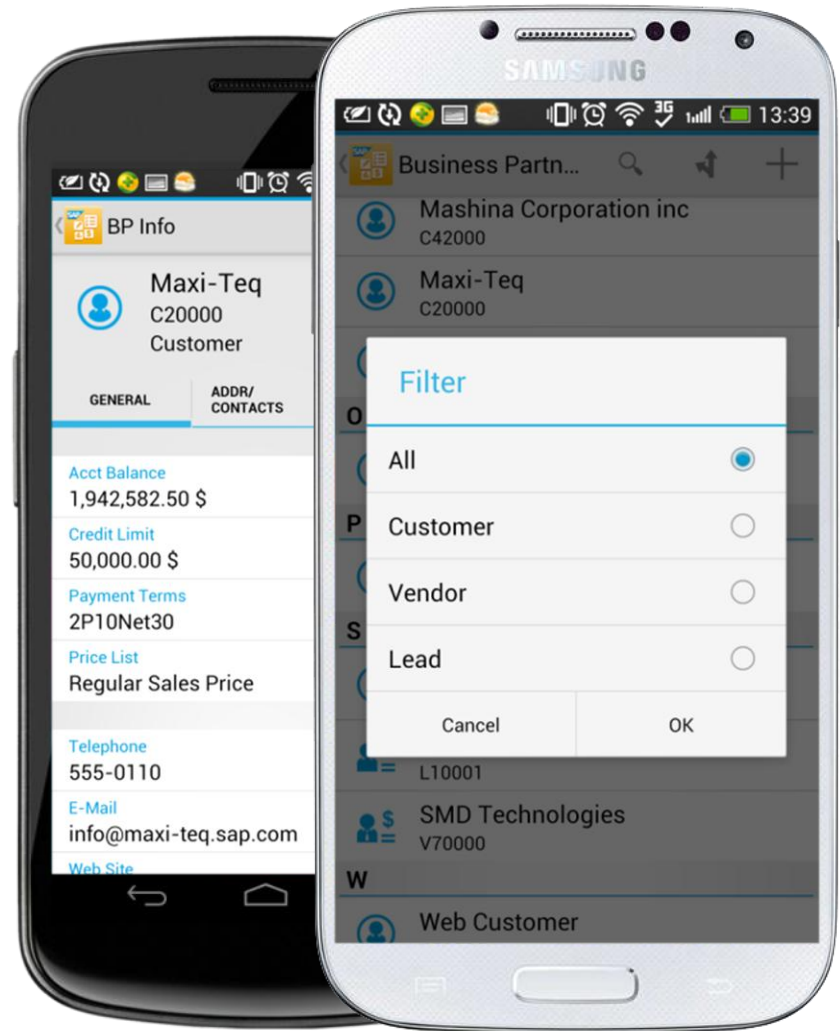

\* 3rd party PDF reader app is required

# Key features – Access business partners

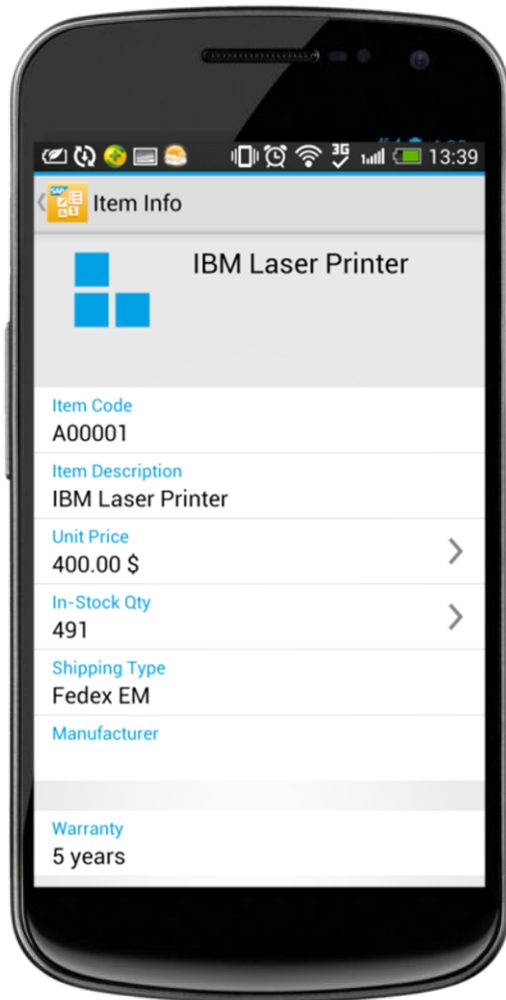

## Manage business partner information

- Create new customer, vendor, or lead records
- View Business Partner details, including account information
- Access related sales documents (i.e. sales quotations, sales orders, sales opportunities)
- Check addresses, e-mail addresses, phone numbers, contact details
- Initiate a phone call or e-mail
- Locate your contact on a map
- View historical activities and special prices

# Key features – Monitor inventory and drive sales

## Monitor inventory and product data

- Check inventory levels
- Obtain detailed information for items in stock
- Preview item pictures and check pricing information such as purchase and sales price
- Find detailed inventory information for each one of your warehouses

# Installation and free trial for everyone

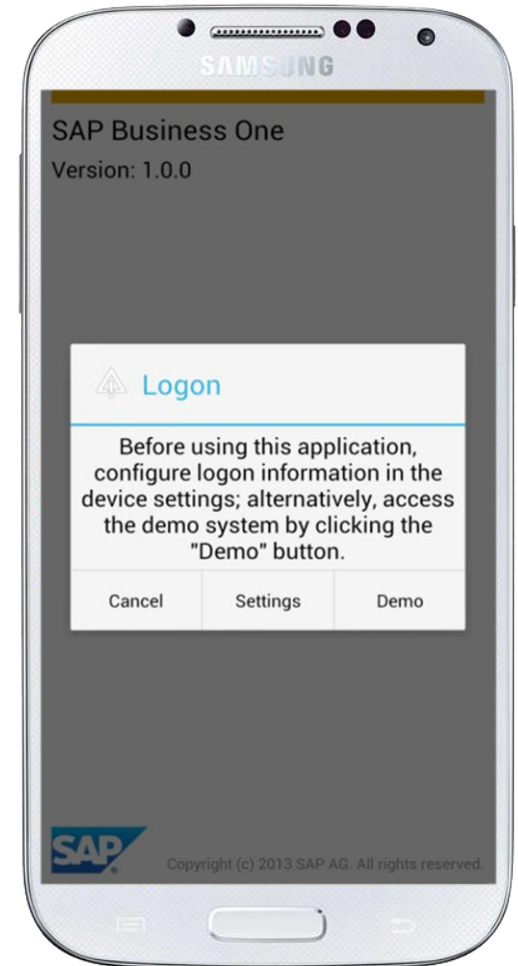

## Test-drive the app today

Even if you're not an SAP Business One customer, try a demo of the app and see how it will change the way you do business.

SAP provides a hosted SAP Business One environment that you can connect to instantly.

## Two easy steps to start your demo or trial:

- Install the free app on your device from SAP Store, Samsung KNOX, or [Google Play](#)
- Start the app and use the demo option for logon\*

\* For best performance in China, configure the Settings -> Demo Server: China

# Get connected to your business information

## Required backend:

To use this app with your own business data, you must run SAP Business One Release 8.82 PL12 or 9.0 or higher versions

## Licensing:

Professional, limited (limited Financial / Logistics / CRM), or starter package licenses for SAP Business One cover use of the mobile app

## Supported devices:

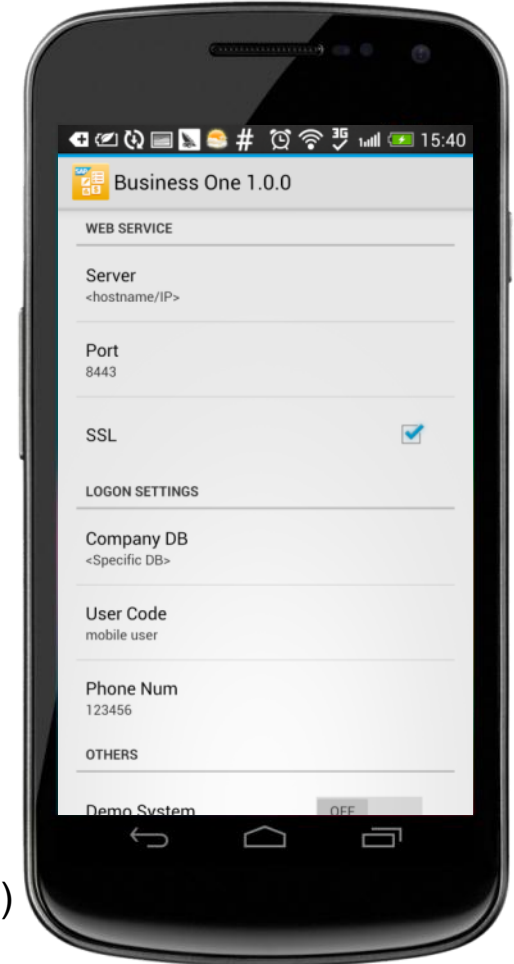

Android OS 4.0 or higher. Our universal app is currently optimized for Android phones, but also support tablets

## Supported languages:

All SAP Business One languages supported by Android

## Security:

- Online server access secured by SSL / VPN, no offline usage
- Binding of up to two Device IDs to one user
- Basic access authentication at logon, license-based function-level authorization, and user-based data-level authorization (data ownership)
- No data storage or caching of business data on the device

# Release details

**Note:** New app versions are backward compatible. See compatibility concept in [SAP Note 1924930](#)

## **Version 1.1.x – Planned new functions** (some only supported in conjunction with latest backend versions)

- Parameterized reports
- Activity enhancement
- Sales documents enhancement
- HANA specific features

**Planned availability app 1.1.x:  
March 2014**

# Positioning and planned functions

---

The SAP Business One mobile app for Android delivers core functions, including business processes, reporting, and generic extensibility to your mobile device.

Additional, specific requirements are covered by Software Solution Partners.

## **Selected functions planned for upcoming releases:**

- Sales Catalog
- Add/Edit addresses in Business Partner module
- Add/Edit contacts in Business Partner module
- Choose company during logon
- KPI view
- Pictures in Inventory module
- Modules management
- Bar code scanner
- Synchronize activities into the calendar of the mobile device
- Add-on concept

# Technology background - SAP Business One Mobility

## Mobile capabilities based on the integration framework of SAP Business One

- Technology for building mobile applications to give customers constant read and write access to their most important data in SAP Business One, available as of Version 8.8 PL12
- Supports transactional processes and analytics with real-time access to information
- Basis for Software Solution Partners to co-innovate and distribute applications specific to additional platforms, industries, business processes, or specific technical approaches
